Media Release

CCP named in CIOReview's Top 20 IoT Companies

CCP Technologies Limited (ASX:CT1) ("CCP" or the "Company") has been recognised by CIOReview magazine in the Top 20 most promising IoT (Internet of Things) solution providers for 2018.

CIOReview (www.cioreview.com), a technology magazine, has been at the forefront of guiding organisations through the continuously disruptive landscape and providing enterprise solutions to redefine the business goals of enterprises tomorrow.

According to the magazine (January 2018 edition), "a distinguished selection panel comprising of CEOs, CIOs, VCs, industry analysts, and the CIOReview's editorial board has selected a list of IoT solution Providers that exhibit innovative technologies combined with latest financial strategies".

Michael White, CCP's CEO, said "Being recognised by CIOReview is a testimony of our platform's position in the vast IoT market and a reflection on the professionalism of CCP's team. Our growth in the US, Singapore and Australian markets is underpinned by a compelling value proposition."
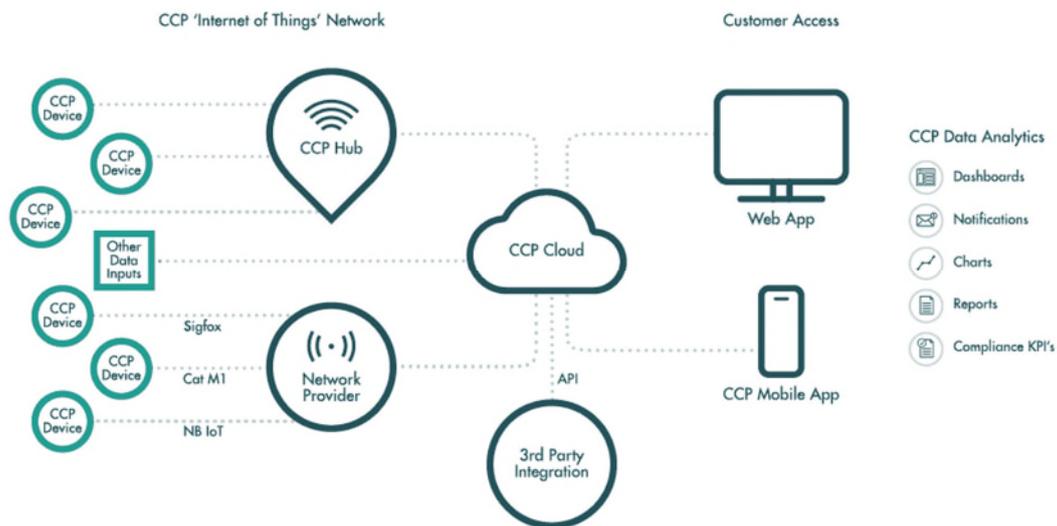

The Company has recently announced the release of a new version Smart Tag that connects to the global Sigfox low-power-wide-area network (LPWAN). Further, the company is set to release NB-IoT and CAT M1 LPWAN connectivity options that will provide access to most IoT networks around the world.

About CCP Network

CCP offers a critical control point management system in Australia and North America, and has an emerging presence in Singapore. Critical control points are the points in a supply chain where a failure of standard operating procedure has potential to cause serious harm to people – and to a business' reputation and bottom line. Standard critical control points include temperature, energy, environment (e.g. air and water quality, pH, chemicals, noise, acoustics and gases) and movement.

CCP captures data using Smart Tags (sensors) and an advanced Internet of Things (IoT) network. Data is delivered to the company's big data cloud platform where it is analysed to deliver business intelligence. Customers access this information through Web and Mobile Dashboards; and they receive real-time alerts via SMS, email and push notifications.

The Company's first target market is the food industry, where food safety regulation, energy savings and waste reduction drives adoption. For further information on the CCP Solution, visit: www.ccp-network.com
